

FOR IMMEDIATE RELEASE

Largest Healthcare Provider in Colombia Chooses MetaPass As Universal Sign-On Solution

*Servicio Occidental de Salud Increases Security
and Consolidates Access to Every Software Application
with MetaPass Technology*

Sunnyvale, California – May 28, 2008 – MetaPass, Inc. today announced the integration and deployment of its universal single sign-on (SSO) solution at Servicio Occidental de Salud, the largest healthcare provider in Colombia. The access to all of the organization's applications, numbering over 100, standard and custom, has now been consolidated, delivering a true 100% single sign-on experience.

Single sign-on gives computer users the ability to log onto multiple systems without having to authenticate with passwords multiple times. Users securely logon once and then access all other applications with a single click, dramatically increasing network security and user productivity, while reducing user frustration and help desk costs. MetaPass is the only single sign-on solution to offer 100% compatibility with all customer applications without any expensive and time-consuming integration work – installation takes at most one day.

"We are very impressed with the ability of MetaPass to integrate with all of our systems, even the most complex and unusual ones, effortlessly" said Carlos Quintana, IT Security Analyst at Servicio Occidental de Salud. "Out of all SSO solutions we evaluated, MetaPass is the only one that delivered on its promise".

Because it is universal, MetaPass is the only SSO in the industry that runs on multiple platforms, such as Windows, Linux, and Mac OSX, on both server and desktop sides. As a flexible and extendable platform, it also integrates with directories (LDAP), provisioning systems (SPML), and strong authentication devices such as smart cards, tokens, and biometrics.

About MetaPass, Inc.

Headquartered in Sunnyvale, California, MetaPass provides the industry's only multiplatform identity and access management software that does not require scripting or programming for total customer integration. Enterprises around the world benefit from MetaPass patented platform to control and simplify access to their digital assets, strengthen security, and comply with regulations.
