VSR Financial Chooses MetaPass as Universal Single Sign-On Solution

*Leading Financial Firm Increases Security
and Productivity with MetaPass' Patented Technology*

Sunnyvale, California – May 20, 2008 – MetaPass, Inc. today announced the deployment of its universal single sign-on (“SSO”) solution at VSR Financial Services, Inc. (“VSR”). The access to all of VSR’s applications has now been consolidated, delivering a true 100% single sign-on experience to all of the firm’s internal and external users.

Single sign-on gives computer users the ability to log onto multiple systems without having to authenticate with passwords multiple times. Users securely logon once and then access all other applications with a single click, dramatically increasing network security and user productivity, while reducing user frustration and help desk costs. MetaPass is the only single sign-on solution to offer 100% compatibility with all customer applications without any expensive and time-consuming integration work – installation takes at most one day.

Because it is universal, MetaPass is the only SSO in the industry that runs on multiple platforms, such as Windows, Linux, and Mac OSX, on both server and desktop sides. As a flexible and extendable platform, it also integrates with directories (LDAP), provisioning systems (SPML), and strong authentication devices such as smart cards, tokens, and biometrics.

“MetaPass is amazingly powerful and easy to use at the same time,” said Chatten Scruggs, Senior Vice President of Technology at VSR. “Our users get logged on to multiple applications at once, with a single click. MetaPass integrated effortlessly with all of our systems, even the most unusual and complex ones. It truly delivers on its promise.”

“We are proud that we have continued to meet and exceed our customers’ expectations at multiple MetaPass enterprise installations,” commented David Dupouy, CEO of MetaPass. “Our goal is to continue to enhance the industry’s leading SSO solution, and the momentum we are generating with ongoing customer successes including leading companies such as VSR has accelerated this effort.”

About MetaPass, Inc.

Headquartered in Sunnyvale, California, MetaPass provides the industry’s only multiplatform identity and access management software that does not require scripting or programming for customer integration. Enterprises around the world benefit from MetaPass patented platform to control and simplify access to their digital assets, strengthen security, and comply with regulations.
